

Communities Against Noise and Speed

(C.A.N.S.)

Particularly with reference to Motorbikes on A32/A272

Has the enjoyment of many of your summer weekends and evenings been destroyed by the roar of speeding, high performance and noisy motorbikes?

Have you felt intimidated or terrorised whilst driving, by the presence of these bikers on your tail or coming towards you?

Have you witnessed breaches of the laws of the road? Overtaking on double white lines or in the face of on-coming traffic? Speeding? Driving without due care and attention? Endangering others?

Join C.A.N.S. by e-mailing your name and mobile phone number to:

cans.a32.a272@btinternet.com

We have formed a steering group to help organise resistance to the invasion of this area by irresponsible and reckless motorcyclists.

We aim to gather as much information as we can from you the residents of villages and properties along the whole of A32/A272 as well as requesting through freedom of information (FOI) Act, data on historical prosecutions, accident statistics and costs.

We aim to capture/record dangerous and reckless behaviour on dash-cam and ensure that this information is passed to the authorities to assist prosecution.

We aim to engage with the motorcycle fraternity to encourage responsible and considerate bike use.

We aim to engage with the "powers that be" to enforce the laws of the road, change legislation if necessary, to adjust speed limits, and install average speed cameras that use rear facing NPR to catch offenders.

We need your help particularly with regard to collecting information so that we can strengthen our case to the authorities. We will provide templates for you to use to record events that you witness.

This organisation is in its infancy but with your support and help we can make for safer road use, safer biking and a peaceful rural South Downs National Park.

Both the above: Intimidating behaviour on the road, breaking the traffic laws with impunity,
(regularly evidenced by the law abiding drivers of the roads), excessive noise from high
performance racing bikes some with modified exhausts to compound the noise pollution.
Driving without due care and attention for other road users. Regularly and consistently
exceeding the maximum speed limit of 60 mph.
